

Fire Vulcan® LED Rechargeable Lantern

Specific lighting needs require specific tools. With the right lighting tool, you can identify potential or existing problems before they interrupt your ability to get the job done. In addition the costs savings of using the right tool over time will benefit your bottom line.

LEDs don't require periodic bulb replacement like incandescents and are virtually indestructible. Streamlight's revolutionary C4 technology combined with an innovative Streamlight-engineered reflector provides sharp, focused light that rivals incandescent intensity without giving up the durability and longevity of an LED. Since LEDs have a long life and won't burn out or won't break, they never need to be replaced. Your light will always be ready when you need it. More powerful and more economical, Streamlight rechargeable LED lighting tools pack a lot more power with ultra-bright white beams and long illumination times. They are extremely dependable and cost-efficient.

The brightest and the lightest rechargeable LED lantern in its class! It weighs just 1.85 pounds and delivers 80,000 candela peak beam intensity. C4 technology produces an ultra-bright beam that's 5 times brighter than competing lights. Life-saving bright blue tail lights ensure you can be seen from any direction, even in thick smoke.
